REMARKS

Claims 1-13, 15-16, and 18-30 remain. Claims 14 and 17 are canceled (duplicate of claim 13); and claims 29-30 are added. Claims 1, 27 and 28 are amended. Minor typographical errors in Specification are corrected.
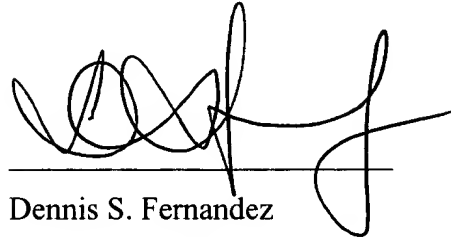

Because Examiner rejects under 35USC102e claims 1-28 per Fan US.5959577, and claims 1-2, and 27-28 per Karmel US.6111441, Applicants amend claims 1, 27 and 28 to define that "... the second transaction message is caused to be sent adaptively by software that matches a mobile buyer interest with a fixed vendor service or product by using past movement or location pattern of the mobile buyer, thereby facilitating local transaction efficiently between the mobile buyer and a nearby vendor." Support appears in Specification page 24, lines 7-11; page 25, lines 20-28; and page 34, lines 16-18.

Cited references neither suggest nor disclose separately or in combination method or software for adaptive transaction between mobile buyer and local vendor(s), particularly considering past movement pattern of the mobile buyer, which advantageously enable efficient mapping of product or service locally where the mobile buyer has a history of conveniently passing by appropriate vendors.

New claims 29-30 specify other novel elements. Support appears in Specification page 27, lines 9-17.

Applicants submit that claims are in allowance condition, and respectfully request

rejections be reconsidered and withdrawn.

Respectfully submitted,

Dennis S. Fernandez
